PROJECTS

1. Betasker
Project Link: http://sharukh.dbtechserver.online/betasker
Technology: Core PHP , Ajax, Framework 7, API integration(Google, Facebook, Geolocation,SendGrid)
My Role: Back-End Developer
Project Description: It is an application for posting jobs and higher applicant's like a freelancer portal. Betasker is a web based application and also based on api.

2. Concon
Project Link: http://forestathome.com/concon/
Technology: Core PHP , Ajax , API Integration, JWT Authentication Token, JSON
My Role: Back-End Developer
Project Description: It Is Chrome Extension, download it to seamlessly fit within your prospecting workflow. It'll help you to make the right decisions when you are working on LinkedIn and support you in moving data quickly to your other sales systems.

3. Kwikisweeps
Project Link: http://kwikisweeps.com/
Technology: Core PHP , Ajax, Payment Gateway Integration
My Role: Back-End Developer
Project Description: Kwikis are a new way for influencers and content creators to get paid. Kwikis are a sweepstakes promotion sponsored by you and managed by us. Anyone who enters into your sweepstake will have a chance to win a 30-minute, live video call with you! You will also provide participants with access to a piece of content you've recently created. You decide how long your kwiki sweepstake will last, but the typical duration is for 1-7 days. After your video call with the winner, we send you the money received from entries. It's that simple!

4. Housekeeper
Project Link: http://sharukh.dbtechserver.online/housekeeper
Technology: CodeIgniter, Ajax, SendGrid, Payment Gateway Integration
My Role: Back-End Developer
Project Description: It is a dynamic website that provides service of cleaning.
It depends on area and shift. Filter is most important part of cleaning services list
